DETAILED ACTION

1. This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the following reasons: See attached **NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES**. Further, the specification makes reference to specific polynucleotide and polypeptide sequences (see Figure 22 for example); these references must contain a sequence identifier of the form: SEQ ID NO: X. Appropriate correction is required. Applicant is given THIRTY DAYS from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Art Unit: 1646

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-29, 33-37, 39 drawn to polypeptides, methods of making a polypeptide, polynucleotides encoding the polypeptide, vectors, host cells, and methods of screening for agonists and antagonists using signal transduction assays.

Group II, claim(s) 30-32, 43, 44 drawn to probes.

Group III, claim(s) 38, drawn to an antibody.

Group IV, claim(s) 40, 41, 45, drawn to ligand binding assays.

Group V, claim(s) 42, 46, drawn to methods of labeling a polypeptide.

3. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Pursuant to 37 C.F.R. 147(d), this Authority considers that the main invention in the instant application comprises the first recited product, namely the polypeptide, and the first recited method of using that product, namely in the process of identifying agonists and antagonists. Also included in this group are the products for making the polypeptide, e.g. vectors and host cells comprising the polynucleotide. Note that there is no method of making the polynucleotide. Further pursuant to 37 C.F.R. 1.475 (b)-(d), the ISA/US considers that the materially and functionally dissimilar product of Groups II, III, and V and the additional methods Groups II-V do not correspond to the main invention. This Authority therefore considers that the several inventions do not share a special technical feature within the

Art Unit: 1646

meaning of PCT Rule 13.2 and thus do not relate to a single general inventive concept within the meaning of PCT Rule 13.1.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Polypeptides and/or methods related to an individual SEQ ID NO. Each SEQ ID NO corresponds to a chemically distinct product, the use of one not being required for the use of any other. Applicant must elect a single SEQ ID NO for prosecution on the merits.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 1646

5. The claims are deemed to correspond to the species listed above in the following manner:

Claim 23- SEQ ID NO: 1; Claim 24 - SEQ ID NO: 13; Claims 26 and 35 - SEQ ID NO: 2, claim 24- SEQ ID NO: 14.

The following claim(s) are generic: 22, 25, 28-34, 36-46.

6. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: each polynucleotide SEQ ID NO and corresponding polypeptide SEQ ID NO represent chemically distinct products, the use of one not being required for the use of any other.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
